

Agricultural Manufacturing Engineer

Mayo Manufacturing has an opening for a full-time Engineer to join our manufacturing team. Applicants must have a strong understanding of engineering principles and manufacturing processes involved in the design of agricultural equipment.

Applicants must possess the ability to communicate and work effectively with other engineers, managers, and production staff. This position includes creating and updating shop drawings, designing new and upgraded machines, writing parts manuals for equipment and updating operating manuals.

Applicants should have an engineering or related degree or relevant years of experience and should be proficient in Autodesk/Inventor/Vault, Office, basic electronics and fluid power systems. Agricultural experience is preferred. Mayo offers a competitive salary and excellent benefit package.

Applicants may apply in person, email employment@mayomfg.com, or online at www.mayomfg.com
